

EXERCISE 4.2

Objective: In this exercise, you are required to create and use the Property Sets to display heat capacity on the flowsheet.

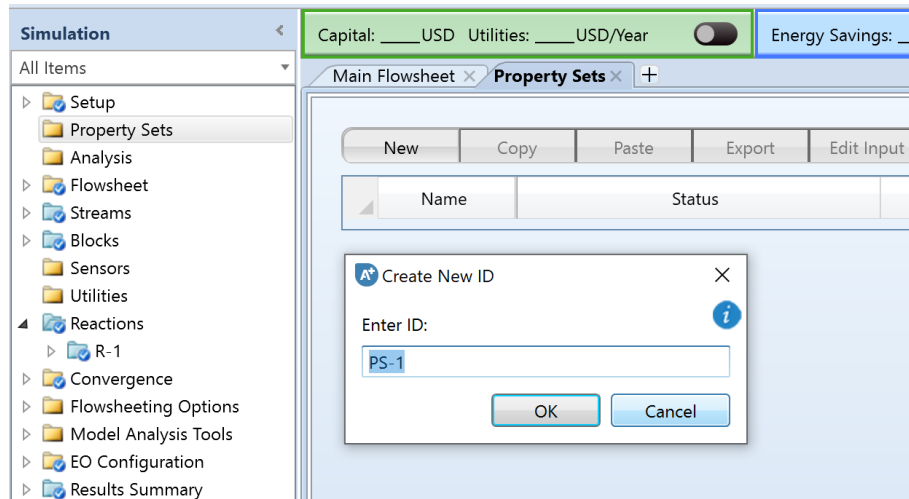

This exercise includes the following tasks:

- i) Task 1 – Create the Property Sets
- ii) Task 1 – Setup the User-Defined Global Stream Data

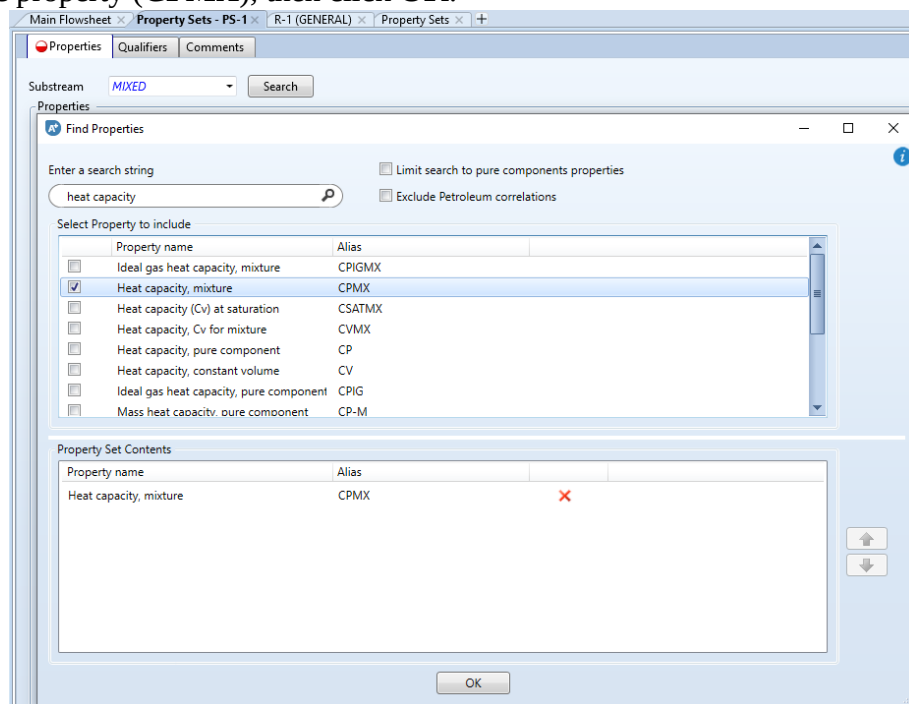

Task 1 – Create the Property Set

1. Launch Aspen Plus V12 and open the simulation file created from the previous exercise (Exercise 4.1).
2. From the Navigation Pane, go to the **Property Sets** folder and click on **New**. Accept the default ID PS-1 and click **OK**.

PART 4: PROPERTY SETS

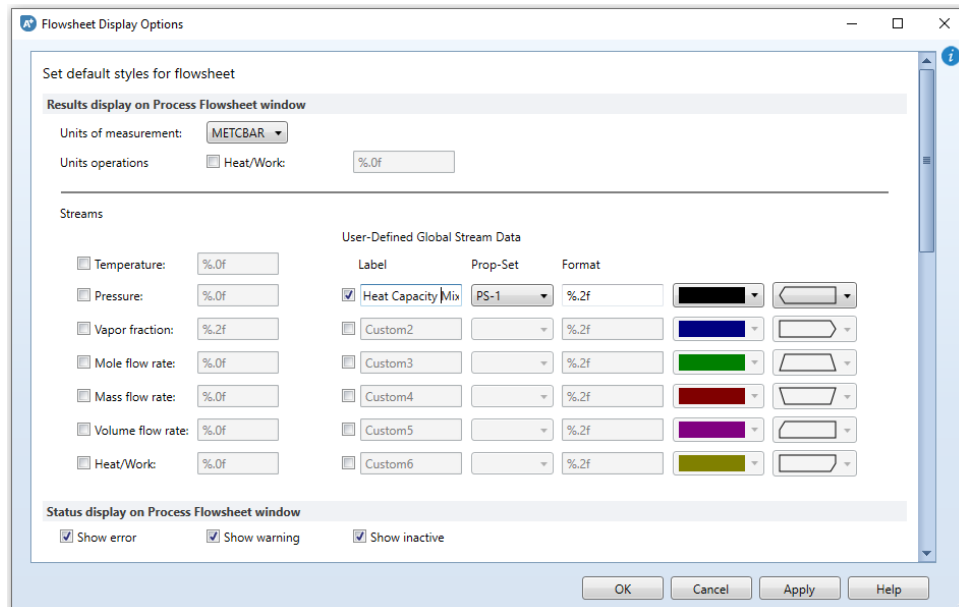

3. Click on **Search** and enter “heat capacity” under the search bar. Select the **Heat capacity, mixture** property (**CPMX**), then click **OK**.

Task 2 – Setup the User-Defined Global Stream Data

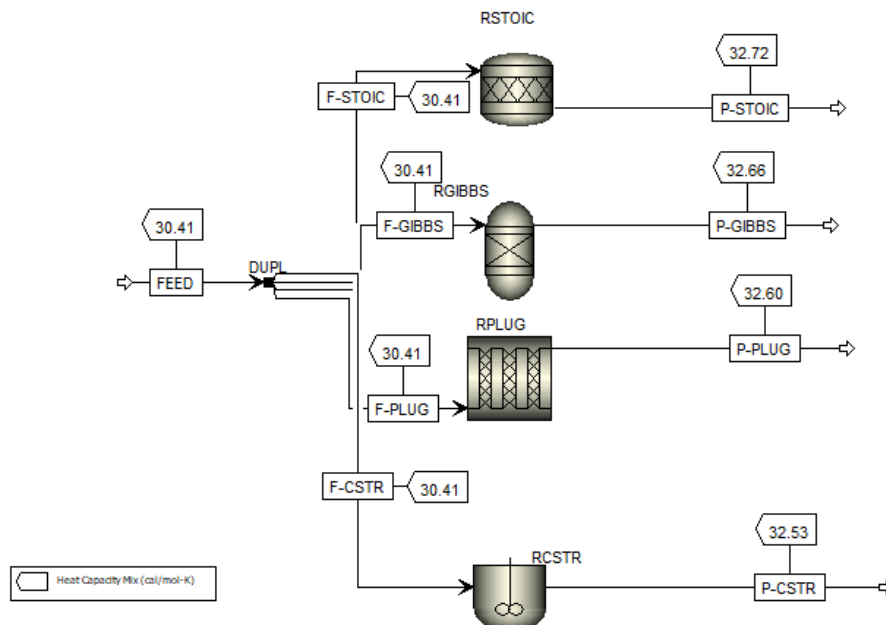

4. Go to **File | Options | Flowsheet**. Under the User-Defined Stream Data section, click on the Prop-Set dropdown box and select the Property Set **PS-1**. Change the label to **Heat Capacity Mix**. Click **Apply**, then **OK**.

INDUSTRIAL PROCESS MODELLING & SIMULATION TRAINING PART 4: PROPERTY SETS

Hint: You can also access the Flowsheet Display options from Flowsheet | Modify | Stream Results, the bottom right corner button.

5. Close the Flowsheet Display Option window and go back the Main Flowsheet to make sure that the flowsheet has results. View new Global Data.

6. Save your model as **EXERCISE4.2.BKP**.
